As we know, we can't make Name field to be unique in Salesforce, and the Validation Rule is one of the solutions, as the blow code :

```
AND(  
  CONTAINS(  
    VLOOKUP(  
      $ObjectType.CustomObject__c.Fields.Name ,  
      $ObjectType.CustomObject__c.Fields.Name, Name  
    ),  
    Name  
  ),  
  OR(  
    ISNEW(), ISCHANGED(Name)  
  )  
)
```
