```

```
public with sharing class GetAllAccountsCntrl {
    @AuraEnabled(cacheable=true)
    public static List<Account> processAllAccounts()
    {
        List<Account> lstAcc = new List<Account>();
        for(Account acc:[SELECT Id, Name,AccountSource,Website, Createddate FROM Account Limit 10])
    {
        acc.Name = "LWC Testing...";
        lstAcc.add(acc);
    }
    Database.update(lstAcc,false);
    return lstAcc;
    }
}
```

Workaround:

Please remove (cacheable=true) from your method declared above, then this will work without any error

```
public with sharing class GetAllAccountsCntrl {
    @AuraEnabled
```

```
public static List<Account> processAllAccounts()
{
    List<Account> lstAcc = new List<Account>();
    for(Account acc:[SELECT Id, Name,AccountSource,Website, Createddate FROM Account Limit 10])
    {
        acc.Name = "LWC Testing...";
        lstAcc.add(acc);
    }
    Database.update(lstAcc,false);
    return lstAcc;
    }
}
```
