Salesforce getUpdated() SOAP method

getUpdated()
Retrieves updated records for the specific time interval.

Example:
getUpdated("Account", StartTime, EndTime)

Reference link is below

https://developer.salesforce.com/docs/atlas.en-us.api.meta/api/sforce_api_calls_getupdated.htm

Note:
There is a limit of 600,000 IDs in the result GetUpdatedResult[]. If your getUpdated() call returns more than 600,000 IDs, an exception EXCEEDED_ID_LIMIT is returned. You can correct the error by choosing start and end dates that are closer together.

getUpdated()
Retrieves updated records for the specific time interval.
